

DATIA 2021 Annual Conference Enhanced Safety Measures

It is DATIA's intention to have a safe and informative 2021 Annual Conference. We are working with the Hotel to develop and implement the following safety measures:

Hotel Common Areas:

- Face coverings are required in all indoor public areas
- Cleaning and sanitizing surfaces will be done at an increased frequency throughout the Hotel
- In guest rooms, Marriott has added to its detailed cleaning practices, requiring all surfaces to be thoroughly cleaned with hospital-grade disinfectants
- All guest rooms will contain disinfecting wipes for guests' personal use
- To help alleviate the risk of COVID-19 transmission through person-to-person contact, Marriott will be using signage in its lobbies to remind guests to maintain social distancing protocols and will remove or re-arrange furniture to allow more space for distancing
- Additional hand sanitizing stations will be located near the entrances and front desks, elevator banks and fitness and meeting spaces

Hotel Meeting Spaces:

- Clearly marked meeting entrances/exits and one-way directional signage
- More frequent cleaning in high traffic areas and during breaks
- Pads and pens will not be provided by hotel
- Hotel will sanitize tables and chair edges prior to each set up and cleaned nightly
- Surfaces including tables, chairs, and all high-touch items will be sanitized between events, buffet utensils changed out every 15 minutes, and there will be ongoing disinfecting of buffet areas & equipment
- Hand Sanitizer placed at the front of the buffet line

*We are assessing the recommendations of the CDC as well as the State & City Officials regarding Covid19. These guidelines may change based on any updated information as we move forward.
